

**Amendments to the Specification**

Please replace [0004] with the following amended paragraph:

[0004] There are a number of available application programs that allow a user to create a custom text images, including font characters, having a variety of visual enhancements. Some of the customizations that can be incorporated into a font include gradient fills, variable widths, outlines, shadows, and other artistic embellishments. These customizations can enhance the appearance of the text rendered using the custom font.

Please replace [0030] with the following amended paragraph:

[0030] With reference to Figures 2 to 4, in an example embodiment the components and subsystems of mobile device 10 are housed within a hard plastic main body case 70 that is configured to be held with one or two hands while the device 10 is in use. The main body case 70 may be a single piece of or may include two or more portions coupled together. For example, in one embodiment, the device comprises a "flip-open" device 100 meaning that the main body case 70 includes two portions hinged together such that the two portions may be brought into closed contact with one another when the device 100 is not in use, as with the embodiment shown in Figure 5. The various components of the device 100 need not be located in the same portion of the main body case 70.
